WHAT'S IT ALL ABOUT?

1 to 25© is a fiendish puzzle where you move the numbers from the outer ring onto the board in the direction of the chevrons. As you place them they must snake together vertically, horizontally or diagonally so they link in sequence from 1 to 25. **Contains 500 games.**

TOO MUCH INFORMATION?

1 to 25© has every piece of information you will need to solve the puzzle. Everything is in plain sight. Reorganizing the abundance of information is the real challenge. Every single number has to find its perfect location to make up the unique solution.

WATCH OUT FOR THE SNAKE!

Sequencing all 25 numbers using a growing snake will really challenge your spatial and visual thinking. Remember snakes don't like to bite their own tails. But they sure do like to coil their bodies to confuse predators.

LOCATION, LOCATION, LOCATION

A 5 x 5 grid with 25 numbers and only one correct location for each number. Each number has five possible locations. Finding the right one is 1 to 25©.

DIRECTION, DIRECTION, DIRECTION

Chevrons also described as fat arrows, indicate exactly where a number can be placed. Follow the direction of the chevrons as they are your best set of clues to help you solve the puzzle.

SIMPLICITY AT ITS BEST!

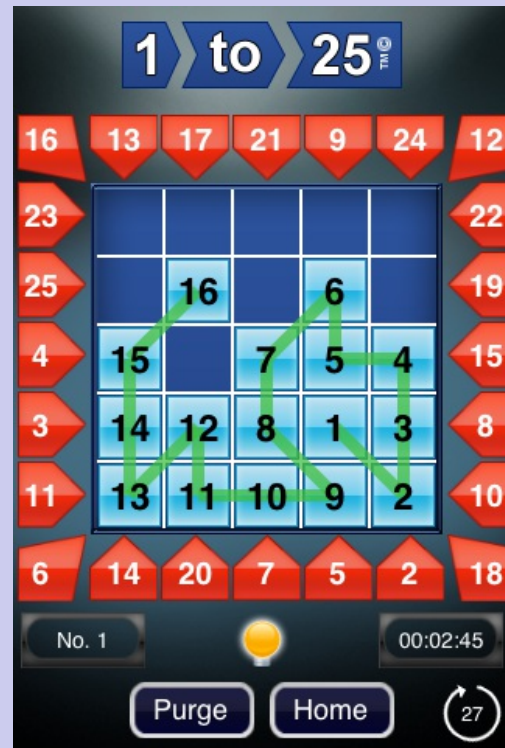

1 to 25© has a purge button. This is a simple and effective way to correct all your mistakes. Purge will remove all incorrectly placed numbers. One simple button makes 1 to 25© flawless to play.

COOL CONTROLS

The sliding and placing of numbers couldn't be easier. Numbers can be placed very quickly and precise. Follow the beam of light, it will show you the way.

A TRACK RECORD OF QUALITY

All the puzzles created for this game were made by Andrew Stuart, who has published puzzles in The Daily Telegraph, The Los Angeles Times, the Beijing Times and in hundreds of other newspapers.

Play 1 to 25© on your iPhone™ and iPod® touch!
